

Important note for teacher:

This project was earlier done from data fetched from national stock exchange for stock listed on indian markets.

“NSEPy” was API provided by national stock exchange ,free of cost.

But due to some reasons the API seems not to be working.

And any other API would have cost me anywhere from 800 to 2000 rupee.

So I scaled down the project to only use simple linear regression on counted data points.

The data is imported using yahoofinancials API, which is free to use but provides limited data for only few time frames but for a longer period of time.

The screenshot shows a web browser window displaying a GitHub issue page. The browser's address bar shows the URL: <https://github.com/swapnilariwala/nsepy/issues/113>. The issue title is "nse Py APIs not working as NSE shifted DNS to www1.nseindia.com #113". Below the title, it says "Mananss101 opened this issue on Jan 4 · 67 comments". The issue body contains several comments from users: Mananss101, Bogaso, johnbest5673, vaibhavsegat, and Cheko1. The right sidebar shows metadata for the issue, including Assignees (No one assigned), Labels (None yet), Projects (None yet), Milestone (No milestone), and Linked pull requests (Successfully merging a pull request may close this issue). At the bottom, it shows 25 participants and an "Activate Windows" watermark.

nse Py APIs not working as NSE shifted DNS to www1.nseindia.com #113

Mananss101 commented on Jan 4

nse Py APIs not working as NSE shifted DNS to www1.nseindia.com effective from 4th Jan 2020.

Bogaso commented on Jan 5

Thanks for let us know about this shift

johnbest5673 commented on Jan 5

One more for your knowledge...
MY python code to fetch the data works till 5:00 pm. Then I get "ConnectionError - 10060"
This is happening since tomorrow.

vaibhavsegat commented on Jan 5

Is there any fix for this?

Cheko1 commented on Jan 5
